JNP

JNP Product Introduction and Selection Guide

Electronic-grade sulfuric acid

Prepared by JNP for product comparison and preliminary selection. This guide is not a supply guarantee, an SDS or a certificate of batch testing.

For preliminary product review of electronic-grade sulfuric acid. Concentration, grade, impurity limits, supply and packaging are confirmed for the specific project.

General parameters and specification review

Parameter	Reference information
Molecular formula	H2SO4
Concentration	Confirm for the specific grade and project
Grade and impurity limits	Confirm for the specific grade and project

Selection and next steps

- Application and objectives
- Specifications and measurement conditions
- Destination market
- Quantity, packaging and lead time; unknown details may be left blank

CoAs are retained as internal quality records. A CoA is not a prerequisite for reading this guide, making an enquiry or requesting a budget quotation. Document requirements for a specific project are agreed separately.

This guide is not an SDS or an operating procedure. Review the applicable safety documentation and site requirements before purchase and use.

JNP is responsible for the compilation, translation and explanation of this guide. Specific specifications and suitability are subject to confirmed product documentation and project conditions.
